## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-13, 23-38 and 64-80 are allowed.

The following is the examiner's statement of reasons for allowance:

The prior art fails to teach or suggest directly or indirectly the limitations, “pre-processing the received frame within each PHY (physical layer) receiver of a plurality of PHY receivers to calculate a corresponding confidence level for each PHY receiver of the plurality of PHY receivers such that each corresponding confidence level indicates whether the received frame is intended for that PHY receiver of the plurality of PHY receivers, wherein the pre-processing the received frame includes using *a first gain to scale the received frame to a range that is appropriate for a majority of the PHY receivers*” and “processing the received frame using the intended PHY receiver, wherein the processing the received frame using the intended PHY receiver *includes using a second gain,*” in combination with other limitation of the independent claims 1, 23, 28, 64 and 73. The applicant has described the process of processing a received frame using *a first gain appropriate for majority of receivers* and further processing the received frame *using a second gain specific to the particular receiver*.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
